

DELIVERABLE 1

Team Name: Angels

Challenge Name: Challenge 1

Idea Name: Angel “A Food Rescue and Redistribution Platform”

Description of the idea:

Angels platform purpose is to aid people in need by stopping food waste from food suppliers & restaurants. Instead of wasting food we will work on solutions distribute it to people facing starvation via volunteer effort. The goal of this platform is not only to reduce food waste by aiding the poor, but also boost and highlight the values of volunteering.

The whole project will be like this:

1. Angels' members will do a research in order to enlist the places where non-profit organizations are, to contact with them, informing them about our platform.
2. The volunteers will be greeted to a homepage that explains analytically Angel's objectives by highlighting what we want to achieve and how they can help us do it. Moreover, our homepage will encourage all our visitors to become volunteers as long as the benefits of volunteering and the disadvantages of food waste will be listed.
3. After they decide whether they want to provide their services, or not, there will be a “sign-up” button in the top right of the page. By tapping on it, volunteers will be transferred to the sign-up page where they will have two options: a) register as a business, b) register as a volunteer (the delivery personnel).
4. Businesses will be greeted with an «excess stock» button and they will have to answer a questionnaire concerning the quality and the quantity of the stock.
5. After all the information is collected, the volunteers will be greeted with a map that presents all the stores that have a product or good ready for pick up within the next 12 hours. There will be a count down from the time the organizations will tap the “excess stock” button until the volunteers deliver the product and tap “done” at their delivery.
